FULL STACK
WEB DEVELOPER

TRAINING

Experis: 2023
A full-time purely Back-End software development course, which gave me a solid foundation for understanding OOP and the Microsoft .NET ecosystem.

Boolean Careers: 2022 - 2023
A full-time web development course, which gave me a solid foundation for understanding programming.

Creation from scratch of Web applications inspired by some of the most famous hits.

Such as Netflix, Spotify, WhatsApp, Dropbox, Discord and Zalando.

Liceo Scientifico: 2017 - 2022
Ordinary Scientific High School Diploma.

EXPERENCIES

Freelance:
In addition to my work as an employee developer, I am currently carrying out freelance activities in the field of programming and software development.

Boostar: 2023
FullStack Developer

At Boostar I explored and put into practice the knowledge learned in the courses previously taken.

What I learned:
- Creating and setting up a serverNode/Apache2
- Deep dive into PHP & JAVA
- Management software development
- Development and publication of Apps in React Native

Experis: 2023
Jr Back-End Web Developer Trainee

After finishing the Boolean course, I won a scholarship and embarked on the Back-End path with C#, SQL Server and Microsoft's .NET technology.

Skills acquired:

- Problem-solving
- Open-mindedness
- Organizzazione

Boolean: 2022 - 2023
Jr Full Stack Web Developer Trainee

After high school, I decided to enroll in the Boolean course, where I learned to write code, manage project deadlines and work in a team.

Skills acquired:

- Problem-solving
- Open-mindedness
- Organizzazione
- TeamWork

VINCENZO FOTI

WHO I AM

I decided to take this path to be able to afford a future degree in computer science.

But at the same time learning more and more about the world of programming.
